

S1-SPC Short Power Cable for Sonos One, One SL and Play:1

Before

After

Flexson's Short Power Cable for Sonos One, One SL and Play:1 is a perfect solution if your speaker is close to a power socket. The standard Sonos power cable is 2 metres (6ft) long, which can leave excess trailing cable if your speaker sits close to the power socket. The Flexson Short Power Cable is a mere 35cm (13.8in) long, which allows for a far neater solution. Ideal for kitchens, tabletops and wall mounting, the Flexson Short Power Cable is a bespoke design for the speaker, complete with right-angled connector. It is available in black or white to match the Sonos One, One SL and Play:1 plus there are versions with EU, UK and US plugs.

- Only 35cm (13.8in) long – compared to standard Sonos power cable, which is 2m (6ft) long
- Eliminates ugly cable clutter
- Ideal for kitchens, tabletops and wall mounting
- Black and White versions to match your Sonos speaker
- UK, EU and US plug editions
